

UI Prototype Sketch: "Initiate a Game"

Player runs/opens Blokus and chooses to start a game.

- Player chooses:
- How many players (1-4)
 - Level of difficulty
 - Mode/setting for visual deficiencies (yes/no)

Game board visible along with players' pieces

displays the players' unplayed pieces
scroll bar

UI Prototype Sketch : "Take a Turn"

Players' turn to play

Player chooses piece from those available

Player places piece on board and the board is updated to show current state.

Now it's the next player's turn

available pieces is also updated to show what is left.
